

## AME 21216 – Tech Memo Score Sheet

A5 – Electronics II

NDID#: \_\_\_\_\_

Lab Section (Day/time): \_\_\_\_\_

Item and Description	Points Awarded	Possible Points
<b>Technical Writing</b> – Please address all questions from the lab handout in the paragraphs and captions. You should have the relevant equations in your paragraphs.		4
<b>Plot of measured high-pass filter amplitudes <math> V_{OUT} </math> vs. <math>f</math> with theoretical curves</b>		3
<b>Plot of measured high-pass filter phase <math>\phi</math> vs. <math>f</math> with theoretical curves</b>		3
<b>Plot of non-dimensional, collapsed data <math> V_{OUT}/V_{IN} </math> vs. <math>\omega RC</math> with theoretical curve</b>		3
<b>Plot of non-dimensional, collapsed data <math>\phi</math> vs. <math>\omega RC</math> with theoretical curve</b>		3
<b>TOTAL</b>		16

### Guidelines for Deliverables

- Use a 12 point “serifed” font such as Times New Roman.
- Document should be double-spaced.
- Document should have 1” margins in all directions.
- Page numbers are required centered at bottom of screen.
- Equations must be numbered.
- All variables must be italicized.
- All variables in equations must be defined (i.e. “where  $c$  is the speed of sound”).
- Plots should always have axes clearly labeled with units.
- Plots should always be centered with captions beneath labeled Fig. 1, etc.
- **Theoretical equations should be plotted as smooth, continuous curves.**
- Captions should be the same font as the rest of the document.
- References should follow the ASME format.
